Versatile consultant blending expertise in information security, technology, interactive learning design, and multidisciplinary media production. A creative problem-solver who seamlessly bridges artistic vision and technical implementation, delivering innovative, forward-thinking solutions with a focus on quality, impact, and reliability.

## Experience

### Accenture

May 2013 - April 2025

Information Security Change Associate Manager Chicago, IL and Remote

- Designed compelling marketing campaigns and multimedia assets—including custom imagery and video content—to promote cross-functional team projects to all 700,000 employees.
- Conceived, architected, and led the development of the internal *Information Security Advocate Dashboard*, a gamified web page hub for promoting training and capturing interactions. The dashboard became the #1 viewed page across all Accenture internal sites within six months of its 2019 launch and has maintained this position to date.
- Developed and standardized comprehensive guidelines for video and image resolution, file formats, compression settings, color palettes, and other media specifications, serving as the team's go-to expert to ensure consistency, quality, and brand alignment across all multimedia used to promote projects.
- Established production standards and timelines for multimedia training materials, focusing on concurrent development and streamlining implementation to deliver high-quality outputs within rapid timelines as short as 1-2 weeks.
- Consulted on design, direction, and technical approach of all internal & externally produced trainings, applications, and initiatives, leveraging design experience and problem solving to improve focus and reach.
- Pioneered and implemented an accessibility standards process requiring the cooperation of multiple teams to achieve enhanced WCAG compliance testing and ensure a consistent and positive end-user experience across devices and platforms.

## Education

### Iowa State University

May 2013

B.S. in Computer Science, Minor in Music Technology
